

## Bonanza Creek Energy, Inc.

---

Job Title: EHS &RC Compliance Specialist

---

Bonanza Creek Energy, Inc., an independent oil and gas company engaged in the acquisition, exploration, development and production of oil and associated liquids is currently searching for an EHS&RC Compliance Specialist for the EHS&RC team in our Evans, CO field location.

### Summary of Position

This position is responsible for leading the field programs required to ensure compliance with CDPHE's fugitive gas vapor (methane) emissions rules. These responsibilities include participating in field required STEM and LDAR compliance inspections, minor leak repairs and follow-up procedures. It is expected this individual will work in unison with Field Environmental Compliance Technicians, Environmental Compliance Managers, technical staff and field operations staff in this role. The duties include understanding and complying with local, state and federal laws and regulatory requirements and identifying and implementing compliance program improvements.

### Job Description

- Responsible for field environmental and regulatory compliance, leading fugitive gas emissions inspections and leak repairs.
- Work on assigned team, with Compliance Technician, capable of handling all STEM and LDAR test requirements
- Perform leak inspections with IR camera, quantify and record leaks with applicable equipment
- Assist as needed in conducting repairs, and act as safety watch and permit administrator as necessary
- Contribute to leak and repair tracking efforts and associated reporting in company database
- Participate in regular LDAR team meetings, as well as periodic reviews/audits to assist in the improvement of efficiency, safety and reporting from the BCEI LDAR team
- Responsible for the field environmental and regulatory compliance, conduction fugitive gas emissions inspections and leak repairs
- Work independently to conduct detailed emissions inspections using optical imaging equipment
- Actively participate in Behavior Based Safety and Equipment Integrity Observation programs
- Manage the tracking, documentation and maintenance of field equipment and facility site diagrams, for regulatory reporting purposes. This data is essential for the efficiency of various departments in the company.
- Manage AIRS ID labeling and regulatory signage posting programs, for all field sites.
- Identify and recommend corrective actions for improving field compliance and assist Field Environmental Manager in development of cost effective solutions.
- Provide relief coverage occasionally for Field EHS Manager, managing associated responsibilities.
- LDAR Program Monitoring Dispatcher
  - Document, process and dispatch investigations for process alarms
  - Organize and execute in-depth investigations
- LDAR Inspections
  - Responsible for field environmental and regulatory compliance, conducting fugitive gas emissions inspections and leak repairs
  - Work independently to conduct detailed emissions inspections using optical imaging equipment
- LDAR Program administrative controls monitoring
  - Review Facility Inspections for accuracy and required response to close out actions
  - Daily review of facility liquid level limits

**Minimum Job Qualifications**

- 5+ Years of experience in oil and gas
- Knowledge of oil field processes, equipment and safety requirements
- Strong attention to detail and good written and verbal communication skills
- Familiarity with environmental and regulatory compliance requirements
