

Trihydro is a leading engineering and environmental firm with more than 430 employees and 20 offices nationwide. Our technical knowledge, regulatory expertise, and successful project delivery have earned us a reputation as one of the top firms in the country. We deliver innovative solutions to clients in the areas of engineering and surveying, environmental, air quality and process management, water and wastewater, health and safety, and information technology.

Trihydro is now accepting resumes for a Senior Air Professional within the Air and Process Services Business Unit.

Position: Senior Air Quality Professional / Oil and Natural Gas

Position Location: Denver, Ft. Collins, CO or Laramie, WY

Job Description: Trihydro Corporation (Trihydro) seeks an experienced Senior Air Quality Professional to provide technical expertise, project and team management, and business development support for our Air Quality Service Area in the Rocky Mountain region. This is an excellent opportunity for a senior air professional to manage and contribute technically to challenging air quality assurance, permitting, climate change and compliance projects for oil & gas, chemical and petroleum refining throughout the western US. The successful candidate will also network with Trihydro's air compliance team to share best practices and consulting opportunities.

The job responsibilities include managing air permits and compliance assurance programs for a variety of oil and gas and industrial clients with complex technical and regulatory issues. Working closely with clients and developing strong relationships to understand specific processes and air quality compliance issues. Achieve client expectations for scope, schedule, budget and quality.

Minimum Qualifications

- Bachelor's degree in chemical, mechanical, civil or environmental engineering or related scientific degree and 10 years of professional experience with state and federal air permits such as PSD/NSR, Title V, MACT, NSPS, GHG, and state air construction permits and regulatory programs.
- Strong oral and written communication skills and the ability to communicate effectively with clients and project team members.
- Demonstrated ability to fulfill commitments on schedule and to do what it takes to meet client service expectations and requirements.
- Strong technical and problem-solving skills, including attention to detail, accuracy, and completeness, as well as a commitment to producing high-quality deliverables.
- Initiative and motivation, with an emphasis on client service and cultivating long standing relationships.

- Acceptable driving record.
- Ability to travel to client locations and other Trihydro offices.

Preferred Qualifications

- Proven track record with 10 to 15 years of relevant air regulatory experience with federal and state regulations that impact the oil and natural gas sector.
- Direct industry employment history in environmental compliance or related field
- Can build and maintain client relationships that generate repeat business to grow Trihydro's Air & Process Services team in the western US and nationally.
- Prepare technical proposals and participate in business development engagements with existing clients and new identified targets.
- Actively participate in regional and federal trade associations, including presentations and panel discussions.
- A flexible working-style and willingness to occasionally modify personal schedules as required to meet project deadlines and/or client needs.
- Can capitalize on existing client relationships to expand Trihydro's profile and market share in other core business segments.

This is a full-time position with excellent benefits (including a 10% 401(k) match).
